

# FLOWBIRD PARK & CHARGE

OUR OMNICHANNEL SOLUTION  
FOR ALL YOUR PARKING & CHARGING NEEDS

## We are on a mission to support our customers by making EV charging simpler and better managed.

To meet the scale and adoption of EV's there is an urgent need to appropriately service charge points and combine them with existing vehicle management services like parking.

Flowbird now offers a suite of EV tools that enable our customers to take control.

Cities enable customers to pay for parking and charging at the same time whilst providing a single point of administration for our city partners.

Adopting deployed infrastructure (CPO role) and providing the benefit of Flowbirds suite of management tools.

Enabling charging via Flowbird's applications and increasing utilization of deployed infrastructure.

Flowbird integrates diverse transport technologies, and manages multiple payment options, through our back office platform, which is trusted by public authorities around the world. We're now able to provide this support in EV charging.

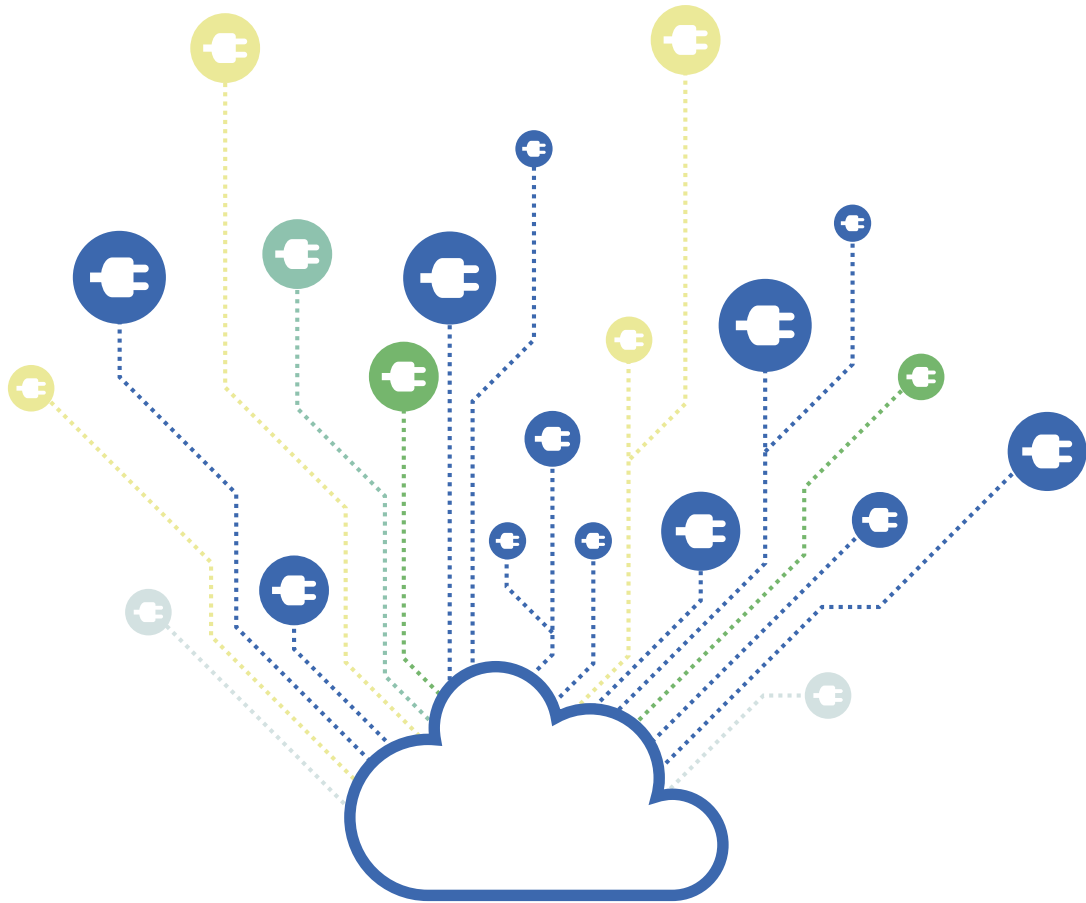

Flowbird offers a complete EV solution for any business case with an open EV platform handling integrations, applications, reporting and analytics for all types of EV scenarios for On Street, Off Street, Destination and Work.

Flowbird offers a complete EV solution for any business case with an open EV platform handling integrations, applications, reporting and analytics for all types of EV scenarios for On Street, Off Street, Destination and Work.

Councils need to work with lots of chargepoint providers to scale quickly, but that creates a fragmented and chaotic landscape. By working with Flowbird, you can quickly bring order to this chaos, and deliver a seamless, scalable experience for a rapidly growing number of EV drivers.

Flowbird offers a hardware agnostic solution and open EV platform for integration with almost any type of charger, Charging portal operator or eMSP roaming network provider.

## CHARGESTORM CONNECTED 2

State of the art EV charger specifically designed to be **safe and easy to use**. Ideal for home, business, public parking and tenant owner housing associations, and it **meets all the required technical safety standards**.

The EV charger is available in **several different power and outlet/charging cable models**.

An Ethernet cable connects the EV charger to the internet. If Ethernet cannot be used, the unit can also be supplied with an optional 3G /4G modem.
