

FLOWBIRD GO!

FLOWBIRD GO+

FLOWBIRD ACCESS

CLOUD BASED OFF-STREET EXPERIENCE

SMART AND DYNAMIC USER EXPERIENCE

- Fully configurable touch-screen interface
- Dynamic user management
- Led sign managed by config for open and close periods
- Built in i/o for native loop and barrier control
- Built in lan for high availability and cost efficiency
- Secure device, data and system integration

1. Gates at entry Entry terminal

To enter the parking structure, the user needs to check in with one of the provided methods:

- Print QR-code
- Enter phone number
- Swipe a credit/debit card
- Permit holder access

2. Pay On-Foot

Before returning to their vehicle, the user will pay for only the time used by visiting the pay-on-foot terminal. The pay-on-foot terminal can be equipped with bill, coin, credit card or tap payment.

3. Barrier at exit Exit terminal

To exit the structure, the car stops at the exit kiosk and presents their previous exit token:

- Printed QR-code
- Enter phone number
- Swipe a credit/debit card
- Permit holder access

SMART AND DYNAMIC MOBILITY ON DEMAND

Built with enhanced technology integrations, the Flowbird GO! / GO+ system offers unique insights into your parking facility, delivering a simple yet dynamic solution with advanced results.

Fully Cloud-Based Solution
No need for an on-site server

Information screens at entry and exit
Display customized messages for your frequent customers, new visitors, and special event guests

**Maximizes Your Return
On Investment**
Save thousands compared to similar systems

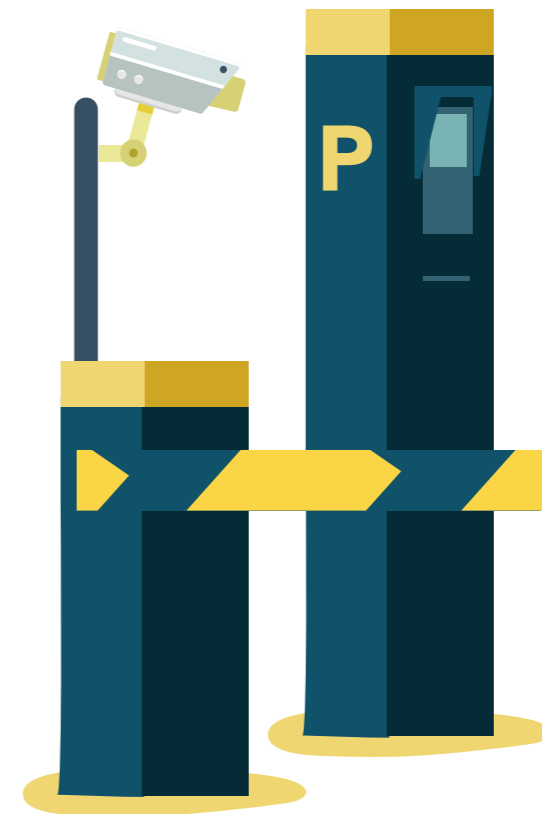

Dynamic QR Code Based Solution
User's parking fee is tracked in the cloud by their unique QR code

ANPR Camera
The ANPR camera records the registration number in the entry and exit line > Flowbird GO+

Flexible and Scalable
Flowbird GO! works in small parking lots, large garages and everything in between

DATA-DRIVEN OPERATIONS

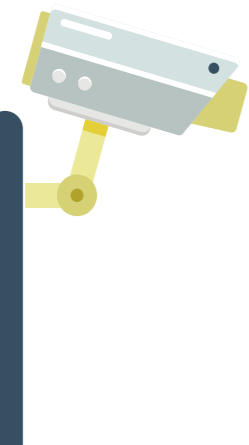

Your operation runs in real time, so should your technology.

The Flowbird GO! / GO+ / ACCESS back-office solution allows for in-depth data analysis to better understand the needs of your city. All payment transactions are stored in a central cloud-based location – your complete data management solution.

Using the database, the reporting module offers advanced summary detailed reports so you can make operational decisions based on your environment and customer behaviors. The Flowbird GO! / GO+ / ACCESS back-office was designed to be powerful but intuitive - you will be a master in minutes.

360 Control

- End-to-end parking rights
- Real-time equipment health reporting
- Third-party integration
- Remote rate and message changes

FLOWBIRD GO+ FLOWBIRD GO+ A TICKETLESS SOLUTION

Flowbird GO+ is a ticketless solution that minimizes administration for the operator.

Flowbird GO+ uses cameras and ANPR technique that scans the registration number on entry and exit. The parking session is started automatically when the motorist arrives and stopped when they leave.

ONE PLATFORM, ENDLESS POSSIBILITIES

Flowbird GO! / GO+ / ACCESS takes into account many use cases specific to parking facilities so you can deliver excellent customer service to new visitors, frequent parkers, and local merchants and employees. Our goal is to give your customers a simple, fast, and stress-free parking experience.

Intercom

Around-the-clock voice call services quickly resolve customer support in-lane.

Validations

Catering to the local business community, Flowbird GO! / GO+ / ACCESS offers a real-time digital parking validation solution. Your team sets up the validations in our back-office suite and provides the rights to merchants to distribute validations to their customers as a value-added service to keep them coming back.

OMNI-CHANNEL PAYMENT PLATFORM FOR MULTI MODALITY

Flowbird HUB

Generate Reports with Precision

- Provide summary reports of the parking facility activity with detailed financial information
- Statistical reports linked to operational performance
 - Occupancy level
- Amounts paid and parking times
- Distribution of payment methods
- Alarm statistics and alarm logs

Frequent Parkers

Streamline monthly account management with our cloud-based portal that is accessible anytime, anywhere. Flowbird can provide a complete permitting solution, deliver a proximity card system, or install an RFID system to help manage monthly parkers.

Flowbird ACCESS

Flowbird ACCESS increases security and simplifies access to the closed garage.

By entering his license plate on a terminal at the beginning of his parking, the user can enter the car park thanks to the access control to the doors and gates via the exit I/O, through Flowbird HUB.
