- **Smart One** maximizes the sales potential of **parking meters**, increasing the **average ticket amount** and **payment compliance**.

SMART ONE

Parking services for a wider audience at minimum cost

SmartOne is a credible alternative for payment of parking or to cancel fines at a parking terminal. SmartOne is useful in countries with high inflation, high insecurity, where coins have a small face value or for people who can't have bank card.

Credible alternative to bank card

SmartOne just requires a contactless antenna, no need to add any PinPad. SmartOne can be reused for years and requires only minimum ongoing expenditure throughout the lifetime of equipment.

Saving operational costs

SmartOne can be reloaded at any time on the parking terminal as well as at third parties agents point-of-sale, reducing the accumulation of coins and notes in the vault and the number of required collections.

Fleet management

SmartOne is a good solution for companies with fleet who can directly manage parking payment avoiding spending time for expense report.

Better knowledge of parking usage

Networked in Flowbird's backoffice as the other means of payment, SmartOne makes it easy to identify revenue made and do statistics regarding the SmartOne use to improve the parking policy.
