Cloud-based

# OFF-STREET

*experience*

# Smart and dynamic OFF-STREET service

- ✓ Fully configurable touch-screen interface
- ✓ Dynamic user management
- ✓ LED signals to communicate open/close availability
- ✓ Built-in input/output barrier control or LPR option
- ✓ Built-in LAN network for reliability and cost efficiency
- ✓ Secure device, data and system Integration

## 1. Gates at entry - Entry terminal\*

To enter the parking structure, the user needs to check in with one of the provided methods:

- Print QR-code
- Enter phone number
- Swipe a credit/debit card
- Permit holder access

## 2. Pay-On-Foot

Before returning to their vehicle, the user will pay for only the time used by visiting the pay-on-foot terminal. The pay-on-foot terminal can be equipped with bill, coin, credit card or tap payment.

## 3. Barrier at exit - Exit terminal\*

To exit the structure, the car stops at the exit kiosk and presents their previous exit token:

- Printed QR-code
- Enter phone number
- Swipe a credit/debit card
- Permit holder access

\*Optional: Gates may be substituted for License Plate Recognition(LPR) system for gateless solution.

# Mobility on Demand

Built with enhanced technology integrations, the Flowbird GO system offers unique insights into your parking facility, delivering a simple yet dynamic solution with advanced results.

Fully Cloud-Based Solution - No need for an on-site server

Maximizes Your Return On Investment - Save thousands compared to similar systems

Dynamic QR Code Based Solution - User's parking fee is tracked in the cloud by their unique QR code

Flexible and Scalable - Flowbird GO works in small parking lots, large garages and everything in between

Information screens at entry and exit - display customized messages for your frequent customers, new visitors, and special event guests

# One platform. Endless Possibilities.

Flowbird Go takes into account many use cases that are specific to parking facilities, and the need for excellent customer service for new visitors, frequent parkers, local merchants and employees. Our goal is to give your customers a simple, fast, and stress-free parking experience.

**Validations** – Catering to the local business community, Flowbird Go offers a real-time digital parking validation solution. Your team sets up the validations in our back-office suite and provides the rights to merchants to distribute validations to their customers as a value-added service to keep them coming back.

**Frequent Parkers** – Streamline monthly account management with our cloud-based portal that is accessible anytime, anywhere. Flowbird can provide a complete permitting solution, deliver a proximity card system, or install an RFID system to help manage monthly parkers.

**Intercom** – Around-the-clock voice call services quickly resolve customer support in-lane.

# Data-Driven Operations

Your operation runs in real time, so should your technology. The Flowbird GO back-office solution allows for in-depth data analysis to better understand the needs of your city. All payment transactions are stored in a central cloud-based location – your complete data management solution.

Using the database, the reporting module offers advanced summary detailed reports so you can make operational decisions based on your environment and customer behaviors. The Flowbird Go back-office was designed to be powerful but intuitive - you will be a master in minutes.

## 360 Control

- ✓ End-to-end parking rights
- ✓ Real-time equipment health reporting
- ✓ Third-party integration
- ✓ Remote rate and message changes

## Generate Reports with Precision

- Provide summary reports of the parking facility activity with detailed financial information
- Statistical reports linked to operational performance
- Occupancy level
- Amounts paid and parking times
- Distribution of payment methods
- Alarm statistics and alarm logs
