FLOWBIRD PERMIT

A MODULAR SOLUTION TO MANAGE PARKING PERMITS

- **The solution that sets the standard** for paperless permit management

- **Online payment capabilities**

- **An intuitive interface** for all users

FLOWBIRD PERMIT

Flowbird Permit is a simple and user-friendly way to create and manage parking permits, meeting the needs of **citizens, authorities, employees, financial managers and private operators.** It is part of Flowbird's integrated platform, **a reliable and secure cloud solution interoperable with most parking sales channels.**

An open solution that is ready for use

Flowbird Permit can be tailored to the needs of each city, offering the ability to **create and manage an unlimited number of user categories** and profiles. **Permits** can be defined based on different criteria: duration, validity zones, type of vehicle, type of vehicle engine, quotas defined by household, by zones, etc.

The Flowbird Permit solution connects to the Flowbird ticket server and can generate flexible period-based subscriptions (e.g. parking rights on Tuesdays and Thursdays), or permits for multiple zones. **It uses paperless documents, which can be issued in physical form if required.**

For users, a simple internet portal that is available 24/7

Users can access a **dedicated internet platform** to process permit applications, with the ability to upload of supporting documents.

After their permits have been validated, users can pay online using a wide range of payment methods. User accounts show **permit history** and invoice information, with options to modify vehicle details, **saving time and enhancing flexibility.**

An efficient and adaptable solution for city authorities

The user internet portal can be **customized to the city's brand.** Flowbird Permit's online management facility helps to limit fraud and reduces the workload of city employees, because users scan and upload supporting documents themselves. The solution is **reliable and secure,** with a document archival system **compliant with the General Data Protection Regulation (GDPR).**
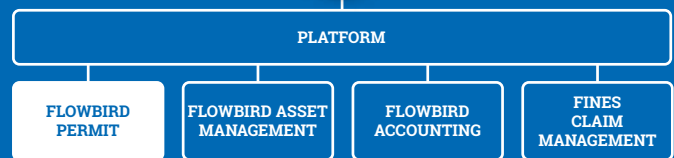

Optimized solution for operators

The Flowbird Permit offers **simple tools for managing validation rules, integrating permit request validation workflows,** and managing permit allocation quotas by zone or by household. The Flowbird Permit can take into account of **types of vehicles and engine type** (for example combustion, hybrid or electric). This enables the city to implement environmental and pollution strategies.

The Flowbird Permit provides comprehensive and accurate **financial reporting** and can be **connected to a range of sales channels**:

- Flowbird, Cale or IEM parking terminals,
- Flowbird app, EasyPark, OPnGO, ParkNow, Paybyphone smartphone payment applications,
- Off-street parking management solutions: Minipark from Flowbird, Thales, Axiom.

Because of its interoperability, the Flowbird Permit solution can be rolled out by a city fast and effectively.
