

# **UNATTENDED PAYMENT**

### FOR SMART MOBILITY AND BEYOND

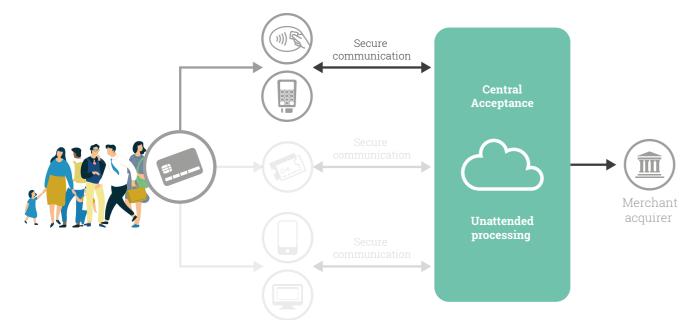

### Flowbird UP is THE LEADER IN MOBILITY **PAYMENTS**

at kiosks, for EV charging and beyond, with a strong track record in parking and public transport markets.

We deliver an end-to-end unattended payments processing solution from card reader to the acquirer specifically adapted to mobility requirements and other business needs.

Our payment expertise in smart mobility is **A KEY DIFFERENTIATOR** 

We operate payment processing within our data centers in France & North America based on high availability set-up and adapted Service Level Agreement specifically for smart mobility, MaaS and more:

- Strong Customer Authentication exemption management meeting Regulatory Technical Standards of Payment Service Directive 2
- No Card Validation Method where applicable
- One-off payment based on known amount
- Adaptive payments covering mobility applications such as parking check-in check-out, EV charging, MaaS and Open Payment
- System integration with card readers and with the central acceptance platform

#### All types and form-factors of cards are supported:

- Contact & contactless cards
- Mobile & wearable wallets

Our devices portfolio can be adapted and configured to fit our customer requirements.

## We simplify **REVENUE MONITORING**

#### CUSTOMERS BENEFIT FROM COMPLETE PAYMENT TRANSACTION AND FINANCIAL PERFORMANCE VISIBILITY THROUGH THE FLOWBIRD UP **REPORTING PORTAL, WITH 3 LEVELS OF SERVICE:**

- Card reader acceptance of all processed payments by type (debit, credit), scheme, card country and currency... plus denied payments with related reason
- Acquirer reconciliation confirming payments settlement and any outstanding issues
- · Collected transactions listing all payments to beneficiary bank accounts

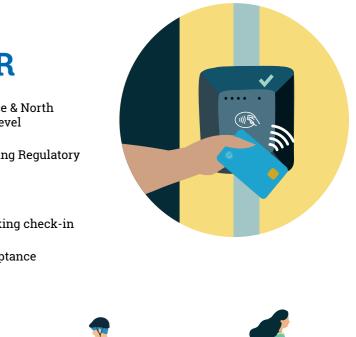

# **SECURITY IS ESSENTIAL**

#### **OUR PAYMENT PLATFORM IS SECURE AND COMPLIANT**

We are compliant with all relevant payment & security standards, guaranteeing the strongest level of security for our customers Platform and solution: PCI-DSS level 1 Card readers: PCI-PTS + EMV L1 & L2 End to end payment chain: L3 · Strong Customer Authentication meeting Regulatory Technical Standards,

- PSD2 compliance
- For France: CB agreement MPA
